*This volume presents a selection of papers delivered at the 8th European Meeting on Ancient Ceramics (EMAC) which took place in Lyon (France) in 2005. The EMAC series of conferences, initiated in Rome in 1991, meets every two years in a European city and brings together specialists carrying out research on ancient ceramics using archaeological sciences. EMAC provides the opportunity to present and debate recent advances in this field of research, from methodological aspects to archaeological studies with fully integrated laboratory approaches.*
