

Dissemination & Public outreach

The Federation members develop tools and resources for the scientific community. They are engaged in disseminating the results of research to a wider public.

Tools and resources

are developed both internally and with external collaboration

Full-chain of mass digitalisation services |

DMS - Document Management System | Archaeology-related multimedia | Online databases & geodata Web portals |

Digital libraries and publications | Multilingual thesauri

Public events

Lectures | Exhibitions | Cultural activities in partnership with cultural bodies | Participation in national and European events

Key partners

General Directorates of Antiquities of the host countries | French & Foreign archaeological Institutes abroad | International and French Universities | Université de Lyon and its member institutions | The Huma-Num digital network | The Frantiq and MASA consortiums | Archaeological societies and regional archaeological services | Museums

A Research Federation on Ancient Societies

Graphic design : Communication Service | FR MOM | Avril 2025

www.mom.fr

The MOM brings together research units. They do interdisciplinary research on the origins and development of ancient societies from Prehistory to the Middle Ages. Its members are involved in international and national projects. The Federation supports transversal activities and promotes technical know-how in developing and disseminating tools and resources.

Fields of expertise

- Archaeology | Archaeometry | Environmental Studies | Geography | History | Ancient linguistics and literatures
- Prehistory | Protohistory | Antiquity | Middle Ages
- Archaeological analyses | Archaeometric techniques | Databases | Digital humanities | Scientific publishing | Open science

Field activities

- About 70 directorships and co-directorships in archaeological and epigraphic fields, with programmes in more than 30 countries

ArAr

Archaeology & Archaeometry
UMR 5138

Archéorient

Environment and Societies of the ancient Near East
UMR 5133

HiSOMA

History and Sources of ancient Worlds
UMR 5189

IRAA - Lyon branch

Institute of Research on Classical Architecture
UAR 3155

Research units

Research federation MOM |
FR 3747 | hosts 4 research units

Research axes

The MOM promotes transdisciplinary and multi-period collaboration around 5 key topics:

- Scientific data management
From collecting to archiving
- Water and Societies
From hydraulics to a sustainable environment
- Constructions in the city and the city under construction
- Science and society
- Lab for Junior research members

Before applying to national and international calls, research projects maturing is supported via an internal call for proposal.

Academic training

Members of the MOM are involved in academic training. About 150 Ph. D. students are working within the MOM research units. Members of the MOM are in charge of the following academic cursus:

- Master « Archéologie, sciences pour l'archéologie »
- Master « Mondes anciens »
- Master « Histoire de l'art »
- Doctorat | Écoles doctorales
ED 483 mention « Mondes anciens »
ED 484 « Lettres, Langues, Linguistique, Arts »

Support services

- Administration services
- Archaeological techniques
Architecture | Cartography - GIS | Topography | Drawing
- Archives
1,5 linear km of scientific archives
- Information systems and computer engineering – "PSIR"
- Library
Documentary resource centre focused on the research fields of the MOM | More than 104 000 volumes | 1 400 titles of periodicals | 1 978 old books from the 16th to the 20th century
- MOM Éditions
In-house collections and co-editions | More than 200 published books | Online publishing on *Persée* and on *OpenEdition Books*

Technological platforms

Competences | Technical skills

- Archaeology and 3D modelling | ArAr
- Cartography | Archéorient and FR MOM
- Ceramology | ArAr
- Digitalisation and databases | FR MOM
- OMEAA | Observation and quantification of past and present environments | Archéorient and EVS
- Radiocarbon dating | ArAr
- Semantic Web and Thesauri | FR MOM
